

Make your own red squirrel

Step 1: Take one tube and cut a wavy tail in it, leaving a band intact at the bottom.

Step 2: With the other tube, fold the centre down into the middle, leaving 2 pointed ears.

Step 3: At the bottom of this tube, in line with each ear, make a small cut up each side.

Step 4: Slot the tail band into the cuts on the other tube and bend the tail out slightly.

Step 5: And now decorate!
